Thank you for the update John.

I will advise the Coast Guard that we are having difficulties procuring LSFO in this area and ask that they allow us to proceed once the surveyor assesses the situation.

Subject: Hoegh Asia - LSFO availability of LSFO in Brunswick
Sent by: John A. Nilsen

Dear Master/Ch.eng,

Pls note after checking with Chemoil, only supplier in Brunswick, there is no avails for this product in port. As LSFO will be replaced by LSDMA or alternative ULSHFO 1 Jan 2015, Chemoil already stopped producing this fuel grade and the avails for same has already become tight or non existing in the market.

Also checked if possible for barging LSFO from nearby ports, but no avails. We can still get LSFO in New York and my suggestion is to get allowance USCG to proceed to this port...

Brgds

John
